

ELEVATOR PADS & OTHER PADDED COVERS

Rocky Industries closely work with variety of elevator manufacturers and our elevator pad has protecting the interior elevator walls, and passengers, precious freights, and cargo from accidental damage. We provide our services to all elevator manufacturers including Otis, Schindler, ThyssenKrupp, Kone, We offer varieties of different colors to different specifications. All our elevator pads conform to the Rule 204.2 for passenger car enclosures and all pertinent U.S.A., Canadian, and GSA Safety Codes; which our pads are made with Fire Retardant per ASTM E84, MVSS302, UND. UL94, CAN3B44-M85, and NFPA 701.

1 CAB STYLE: Identify the cab style based on the diagrams below. Each cab wall is labeled with letters.

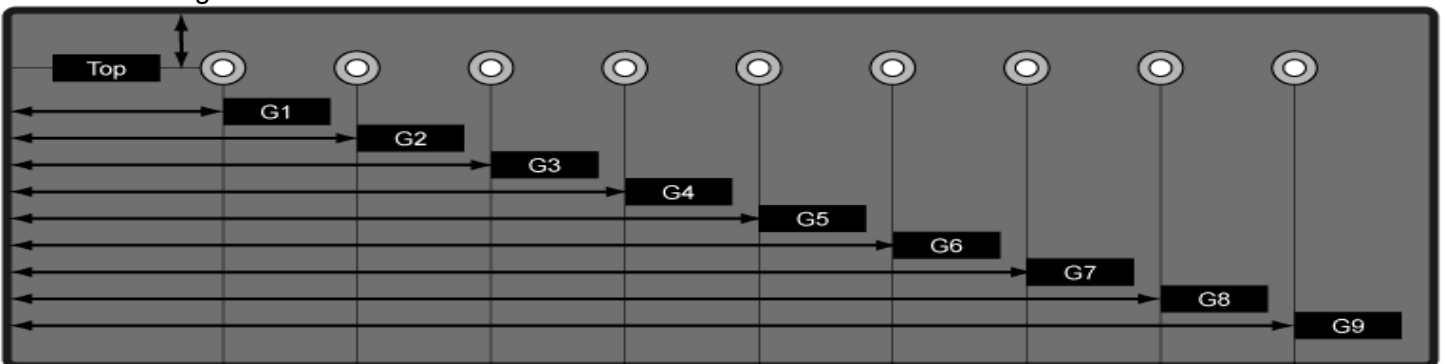

3 HEIGHT: Measure from the top of the wall panel or ceiling to the floor. Subtract 4" from the height to meet fire codes (fire codes require that all elevator pads hang at least 4" from the floor). If you are hanging pads with hooks or clamps, make sure to also subtract the height of the hook. Record each measurement in inches.

2 WIDTH: Measure from the left edge to the right edge of each cab wall.

4 GROMMET LOCATIONS: in general speaking, almost 100% elevators have grommet locations inside.

Grommet locations are required for elevator pads hung with hooks or studs. Measure from the top of the pad to the center of each grommet - this measurement is labeled "top". Next, measure from the left edge of the wall to the center of each grommet. Record each measurement in inches.

5 CUTOUT(SWITCHES) LOCATIONS:

These measurements are only required if your elevator pads need cutouts.

- Top: Measure from the top of the wall to the top edge of the cutout.
- Bottom: Measure from the top of the wall to the bottom edge of the cutout.
- Left: Measure from the left edge of the wall to the left edge of the cutout.
- Right: Measure from the left edge of the wall to the right edge of the cutout.

6 MATERIAL & COLORS: Choose the material and the colors from Heavy Duty Vinyl, Premium Heavy Duty Vinyl, or Rugged Canvas
